EAST RIVER OAKS

174 ACRE MIXED USE DEVELOPMENT OPPORTUNITY **PENSACOLA, FLORIDA**

INTRODUCTION

MACALLAN REAL ESTATE is pleased to present one of the premiere development opportunities along the Florida Gulf Coast. East River Oaks consists of 174 acres located at the intersection of Nine Mile Road (US 90) and I-10. With excellent access and visibility, the property offers an opportunity to develop a mix of retail shopping, office, medical, multifamily apartments and single family housing. The site is located directly across the street from the new \$1 Billion Navy Federal Credit Union Headquarters, which currently employs 6,000 workers and will eclipse 10,000 workers by the year 2020.

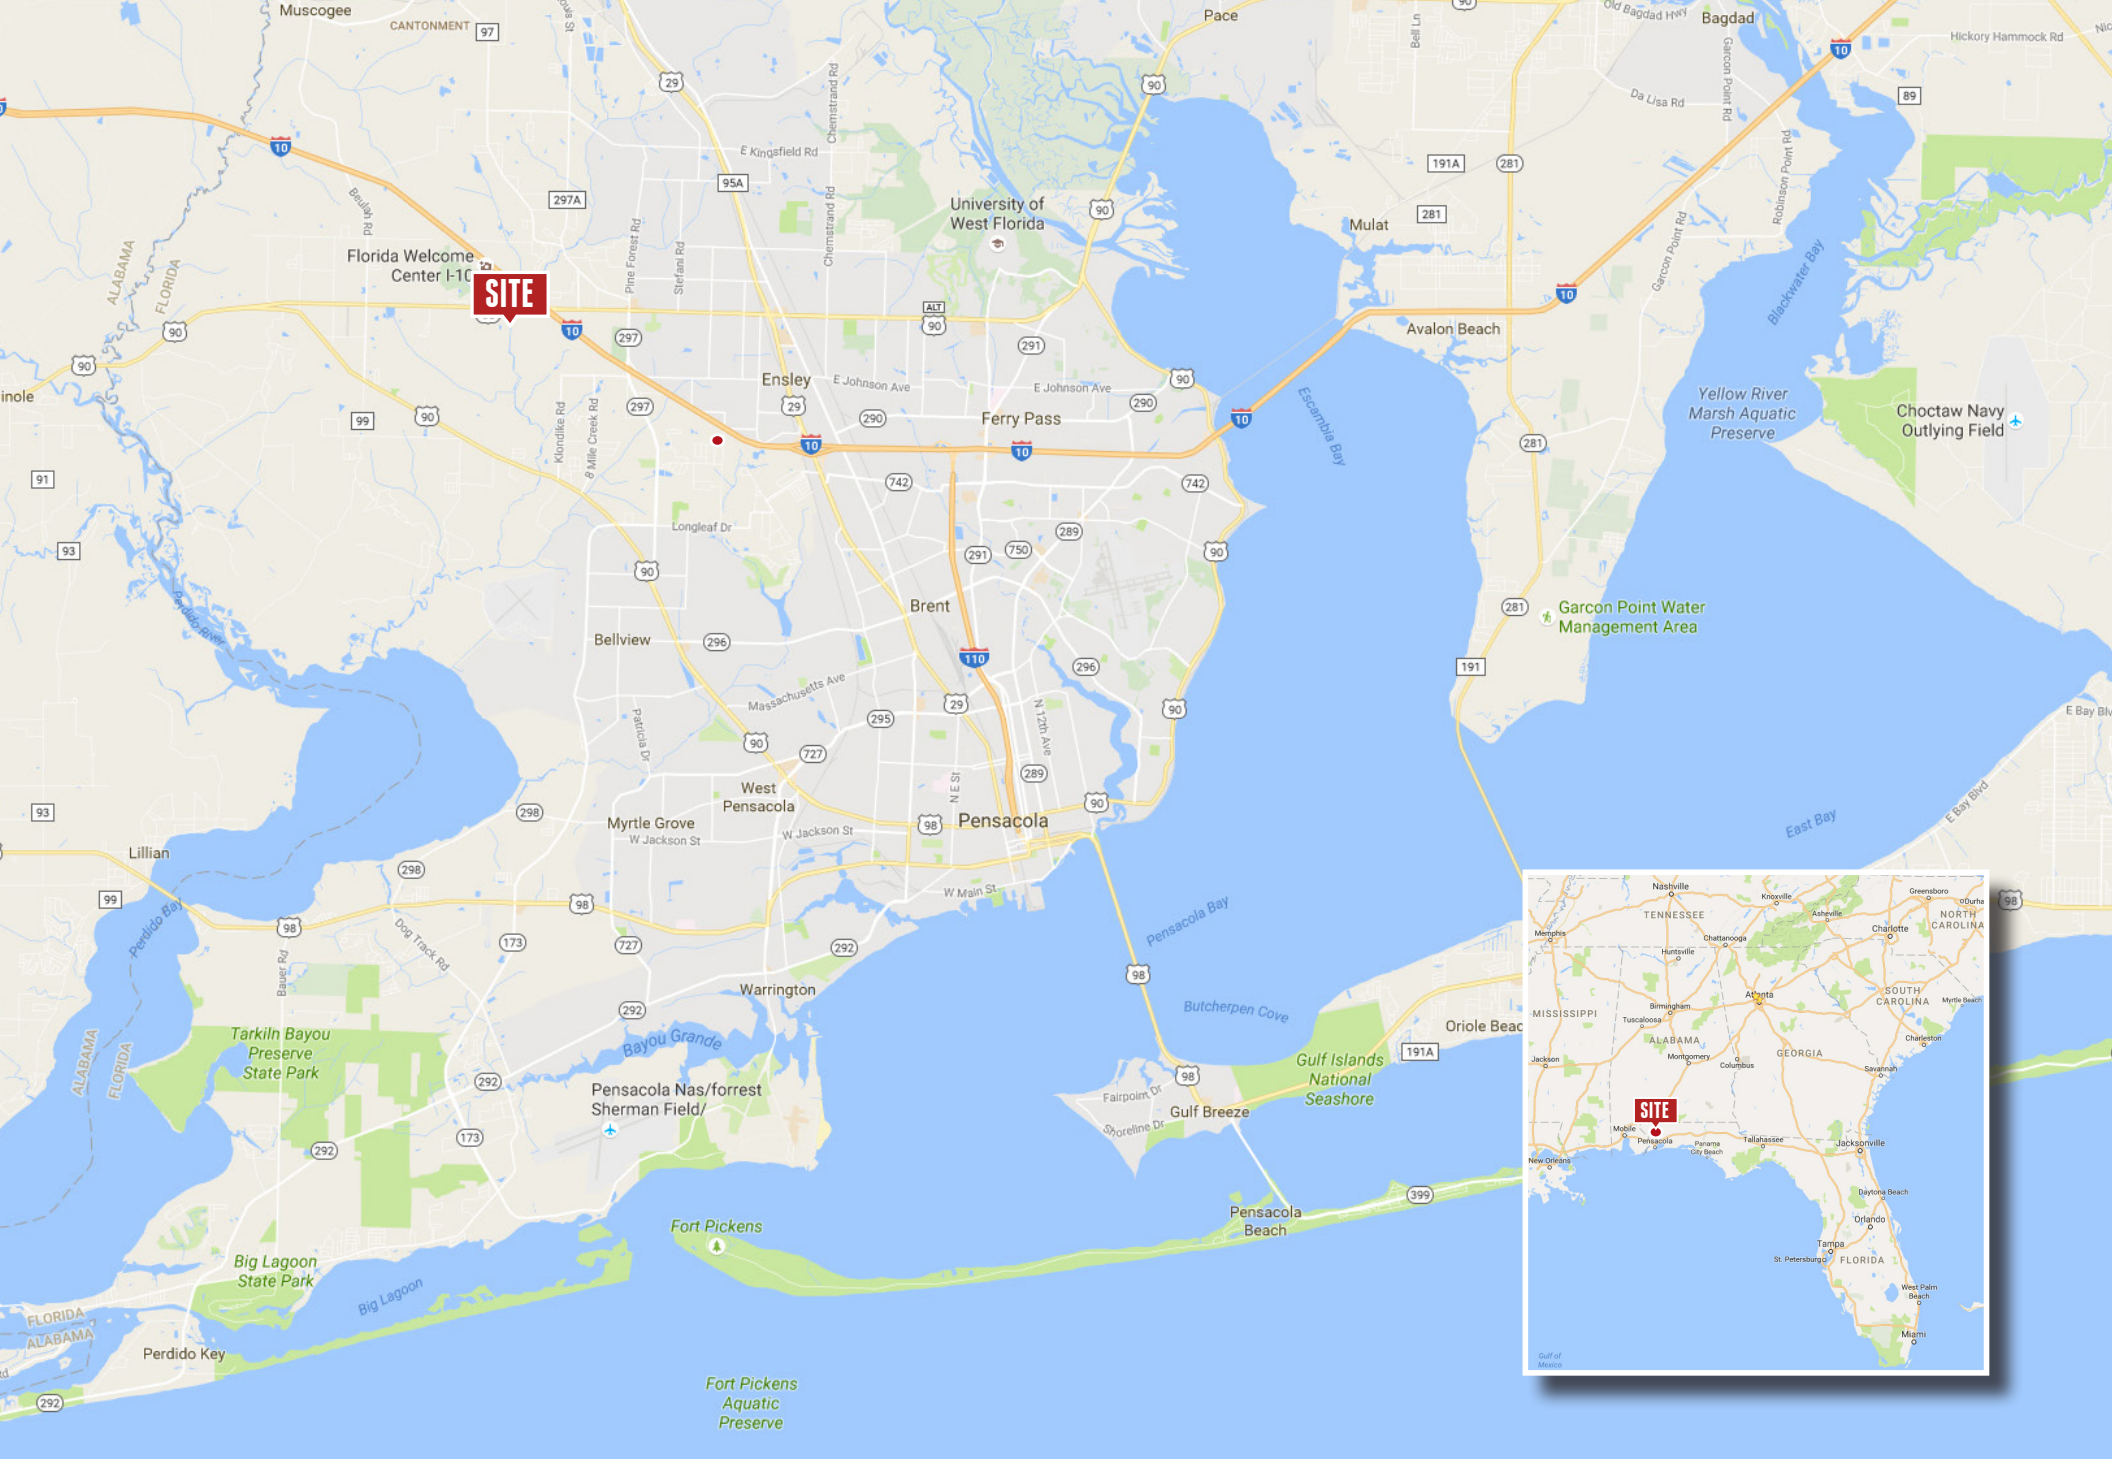

PROPERTY FEATURES

| | |
|------------------------|--|
| Asking Price: | \$13,200,000 (\$75,601/Acre) |
| Size: | 174.6 Acres (122.2 Acres Upland) |
| Frontage: | 1,180 Feet on Nine Mile Road (US 90) |
| Traffic Counts: | 26,110 ADT (Nine Mile Road) |
| Utilities: | All utilities are at the site (<i>see page 16</i>) |
| County: | Escambia |
| Proposed Uses: | Retail, Multifamily and Single Family Development |
| Zoning: | Heavy Commercial/Light Industrial |
| 2015 Taxes: | \$47,992.98 |

AREA OVERVIEW

PENSACOLA/ESCAMBIA

The Subject Property is located just north of the City of Pensacola, Florida whose MSA has nearly 500,000 full time residents. The Pensacola MSA is comprised of two counties, Escambia and Santa Rosa, each of which has several smaller municipalities. Pace, Milton, Navarre and Gulf Breeze are the largest communities. Geographically the area consists of pine forests, beaches, bays, rivers and wetland flood plains. I-10, US Hwy 98, US 29 and US Hwy 90 are the main roadways that connect the city to the outside world. Major logistical infrastructure is in place with an international airport, seaport and railroads. In general, the area's main industries are military and tourism focused. As the local retiree population continues to grow and age, the healthcare industry has grown substantially.

UNITED STATES MILITARY

Pensacola was settled in 1559 by Spanish explorers. Since then the area has been a major military hub and was a critical port during the civil war. Today the area is home to Eglin Air Force Base, which is the largest in the world and several other military installations. The number of active military personnel in the area has risen sharply with the most recent military base realignments. The Department of Defense (DoD) is the largest economic engine in Greater Pensacola, with more than \$7.8 billion in total economic impact. The Greater Pensacola Region is also home to Naval Air Station (NAS) Pensacola, Saufley Field, Corry Station, Naval Hospital Pensacola and Whiting Field.

Economics

- 27,631 uniformed & civilian jobs
- 330,000 veterans living in Northwest Florida
- \$7.8 billion annual economic impact
- \$409 million annually in defense procurement spending
- \$82,890 average wage for military/defense related jobs

August 26, 2016

NAVY FEDERAL CREDIT UNION

Navy Federal Credit Union, which is the largest credit union in the United States, has moved its operations center to Pensacola and will create 10,000+ new jobs by 2020. Roughly 6,000 of those jobs will be in place by the end of 2016. The new \$1 Billion campus, located along Nine Mile Road at I-10, is currently under construction of the last phase. This has dramatically impacted and will continue to impact the local real estate market, especially housing needs.

AREA OVERVIEW - CONTINUED

ESCAMBIA COUNTY BUSINESS PARK

One mile west of the subject Property, the US Navy owns a 640 acre helicopter training facility. Escambia County has entered into an agreement with the US Navy to swap land and relocate the training facility to another location in Santa Rosa County. Escambia plans to develop the site into large commerce park to attract industrial and office users. It is expected that 5,000+ jobs will be created on this site over the next decade.

TOURISM

As mentioned, tourism plays a major role in the local economy. With beaches, festivals, water sports, historical sites and a thriving downtown, Pensacola has become a major highlight of the Emerald Coast. Though the majority of the white sandy beaches are located south of downtown, along Pensacola Beach or Perdido Key, the whole metro area is focused on waterfront living. Like many of the Gulf Coast's destinations, Pensacola has seen record years since 2012. Hotel occupancy rates and visitors spending have grown substantially year over year. However, the area is still known to be one of the most affordable along the Gulf Coast. No new resorts or condominiums have been built since the downturn, but several new hotels are in the planning/construction process. The City of Pensacola constructed Bayfront Stadium in 2012, which is now home to the Pensacola Blue Wahoos. This along with many other area enhancements has enticed restaurateurs and encouraged new housing developments in the area. The site is perfectly situated to take advantage of tourist traffic as it is the First Exit off I10 coming into Florida and the last exit leaving Florida.

HEALTH CARE

Sacred Heart Health System is Northwest Florida's leading provider of high quality health care to children and adults. The hub of the Health System is the 566-bed Sacred Heart Hospital in Pensacola that includes the region's only Children's Hospital. In 2011 and 2012, Sacred Heart Hospital in Pensacola was rated in an independent national study among the top 5 percent in the nation for superior patient outcomes.

Key services also include a Regional Heart and Vascular Institute, a regional Stroke Center, Level II Trauma Center, a Cancer Center affiliated with MD Anderson Physicians Network, and a large regional network of 150 physicians with smaller offices and outpatient centers located throughout the area. Sacred Heart has more than 4,000 employees and is part of Ascension Health, the nation's largest system of Catholic and nonprofit health care facilities.

Additionally, Baptist Hospital and West Florida Hospital have a major presence in the area with main campuses and outpatient centers. Given the large number of retirees, senior living and continuing care is very prominent with all of the national players active in the area.

AREA OVERVIEW - CONTINUED

EDUCATION

The Pensacola area is home to several exceptional schools and school systems. There are more than 30 public elementary schools in the region, offering impeccable educational experiences for your children. In addition, the area offers countless programs, opportunities and sponsors that allow students to progress in their educational studies. Pensacola also provides a strong homeschool support system for homeschooling families and a wide variety of private schools that can meet you and your family's needs.

High schools, both public and private, thrive in the Pensacola region. Offering advanced technology and sports services, students have the opportunity to excel in any study they wish to pursue. In addition, Pensacola offers vocational and trade schools to provide students with learning centers that facilitate their needs and desires in educational advancement.

Based in Pensacola since 1963, the University of West Florida is the largest provider of higher education, offering a range of associate, bachelor's and masters degrees as well as doctoral programs to more than 12,000 students in its three colleges, and has awarded more than 59,000 associate, bachelor's, master's, specialist and doctoral degrees. The West Florida Argonauts are composed of 13 NCAA sports teams which make up the athletic program for UWF.

Pensacola State College is one of 28 public colleges in the Florida College System committed to affordable, open access to educational opportunities. PSC offers associate and baccalaureate degrees, career oriented certificates, college prep, recreation/leisure, adult education, GED prep, and standard high school diplomas. Pensacola State College services Escambia and Santa Rosa counties by providing convenient, accessible education at three campuses, three centers and online. PSC was recently ranked in the nation's Top 50 producers of associate degrees in several disciplines.

Pensacola Christian College is a large provider of private education with an enrollment of nearly 5,000.

Technical education is available at George Stone Technical Center. Troy University and Virginia College also operate branch campuses within the area.

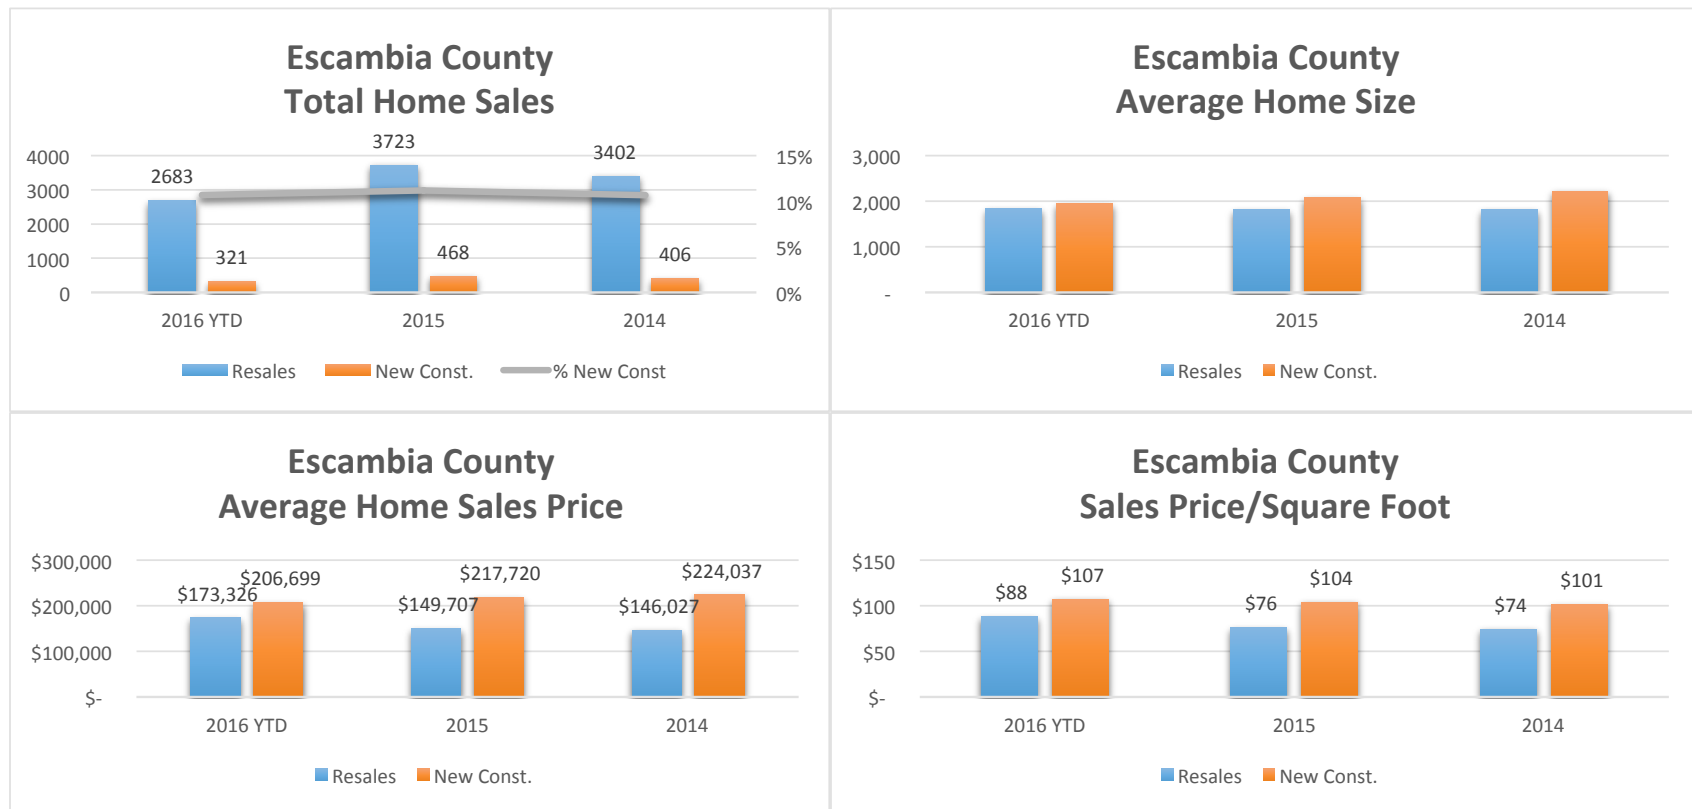

MARKET OVERVIEW

Greater Pensacola has seen a surge of new development over the last decade. Without a doubt, the largest construction project currently underway is the new Navy Federal Credit Union headquarters and it is truly the epicenter of the commercial and residential growth. New apartments, retail shopping centers and single family homes are in high demand along Nine Mile Road and the Pine Forest/Beulah area to accommodate the influx of people moving to the area. Several new subdivisions are under construction west of the subject property. Nature Walk is a high end community that has done very well over the past few years, but is nearing completion. ***Within a one mile radius of the subject property, the average sales price for single family homes in 2016 is \$352,360 (\$132 per square foot).***

PROPERTY OVERVIEW

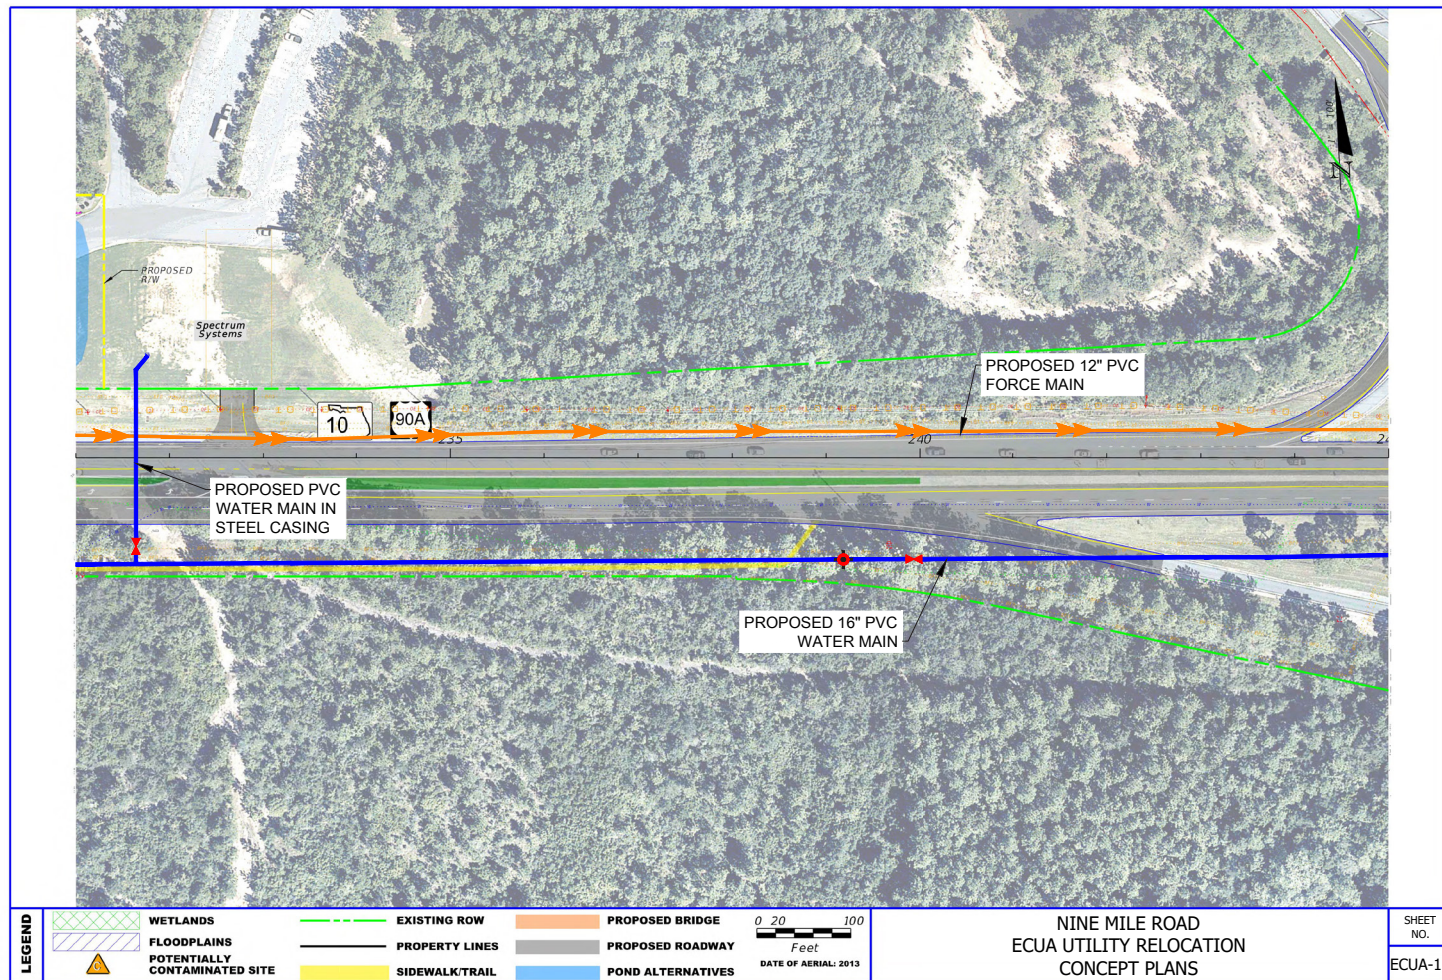

The property consists of 174 acres and generally has very moderate topography. The site is heavily treed with a mix of large pines and oaks. There are approximately 54 acres affected by wetlands, stream buffers and flood plain. The remaining land is suitable for and zoned appropriately to accommodate all types of development, including retail, single family, office, industrial and multifamily. Depending on the exact mix of uses, the property may need to be downzoned from heavy commercial to a mixed-use designation. All utilities are at the site with sufficient capacity.

WETLANDS MAP

The Seller has engaged BIOME Consulting Group to identify the wetlands on site and submit a Nationwide Permit to the United States Army Corps of Engineers. This permit allows for 0.5 acres of wetland impact and should be completed in early 2017. This process has been initiated by the Seller, but is expected to be completed by the eventual Buyer/Developer. Depending on intended site profile additional wetlands may be impacted on the site, but further study and additional permitting would need to be submitted. The nationwide [general] permit will allow retail development to commence and will establish access to the rear of the site.

NINE MILE ROAD
ECUA UTILITY RELOCATION
CONCEPT PLANS

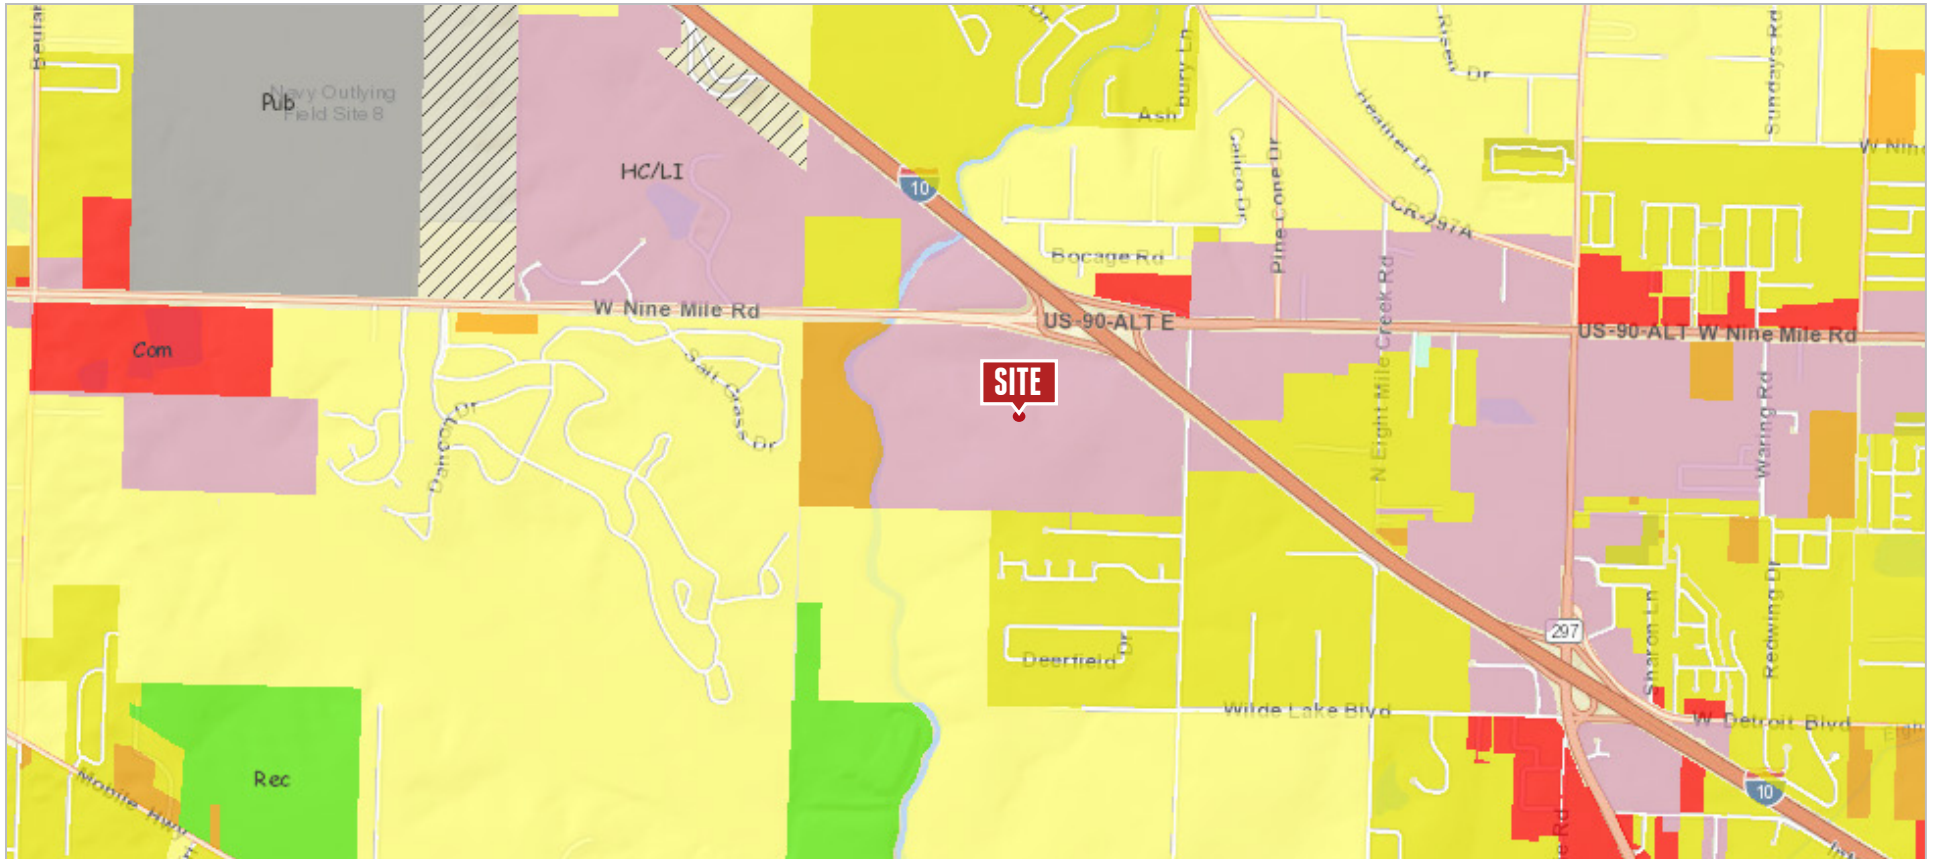

SHEET NO.
ECUA-12

WATER & SEWER

Water and Sewer service to the site is provided by the Emerald Coast Utilities Authority (ECUA). Water and sewer are both available from Nine Mile Road which runs along the northern boundary of the site.

There is currently an existing 16" water line along Nine Mile Road which has plenty of capacity for future development on the East River Oaks site. See Exhibit C for the ECUA Area Water / Sewer map reflecting the location of this line. This line has already been scheduled for replacement / upgrade as part of the current Nine Mile Road widening project underway. In addition, ECUA is adding a second, 8" water line along the north side of Nine Mile Road to help service the NFCU project at some point in the next 24 months.

Given the flat topography of this area of Florida, sewerage services are generally provided by a series of lift stations (pump stations) and force mains. This is the case with the East River Oaks property and all sewer for the site will need to be pumped from the site to lift station #231, which was recently upgraded and can handle additional capacity.

ZONING

The HC/LI zoning category is fairly broad and will allow a variety of commercial and residential uses. While future development of retail, office, and residential uses will obviously require permitting, no rezoning is required. There are no site specific zoning conditions on the property.

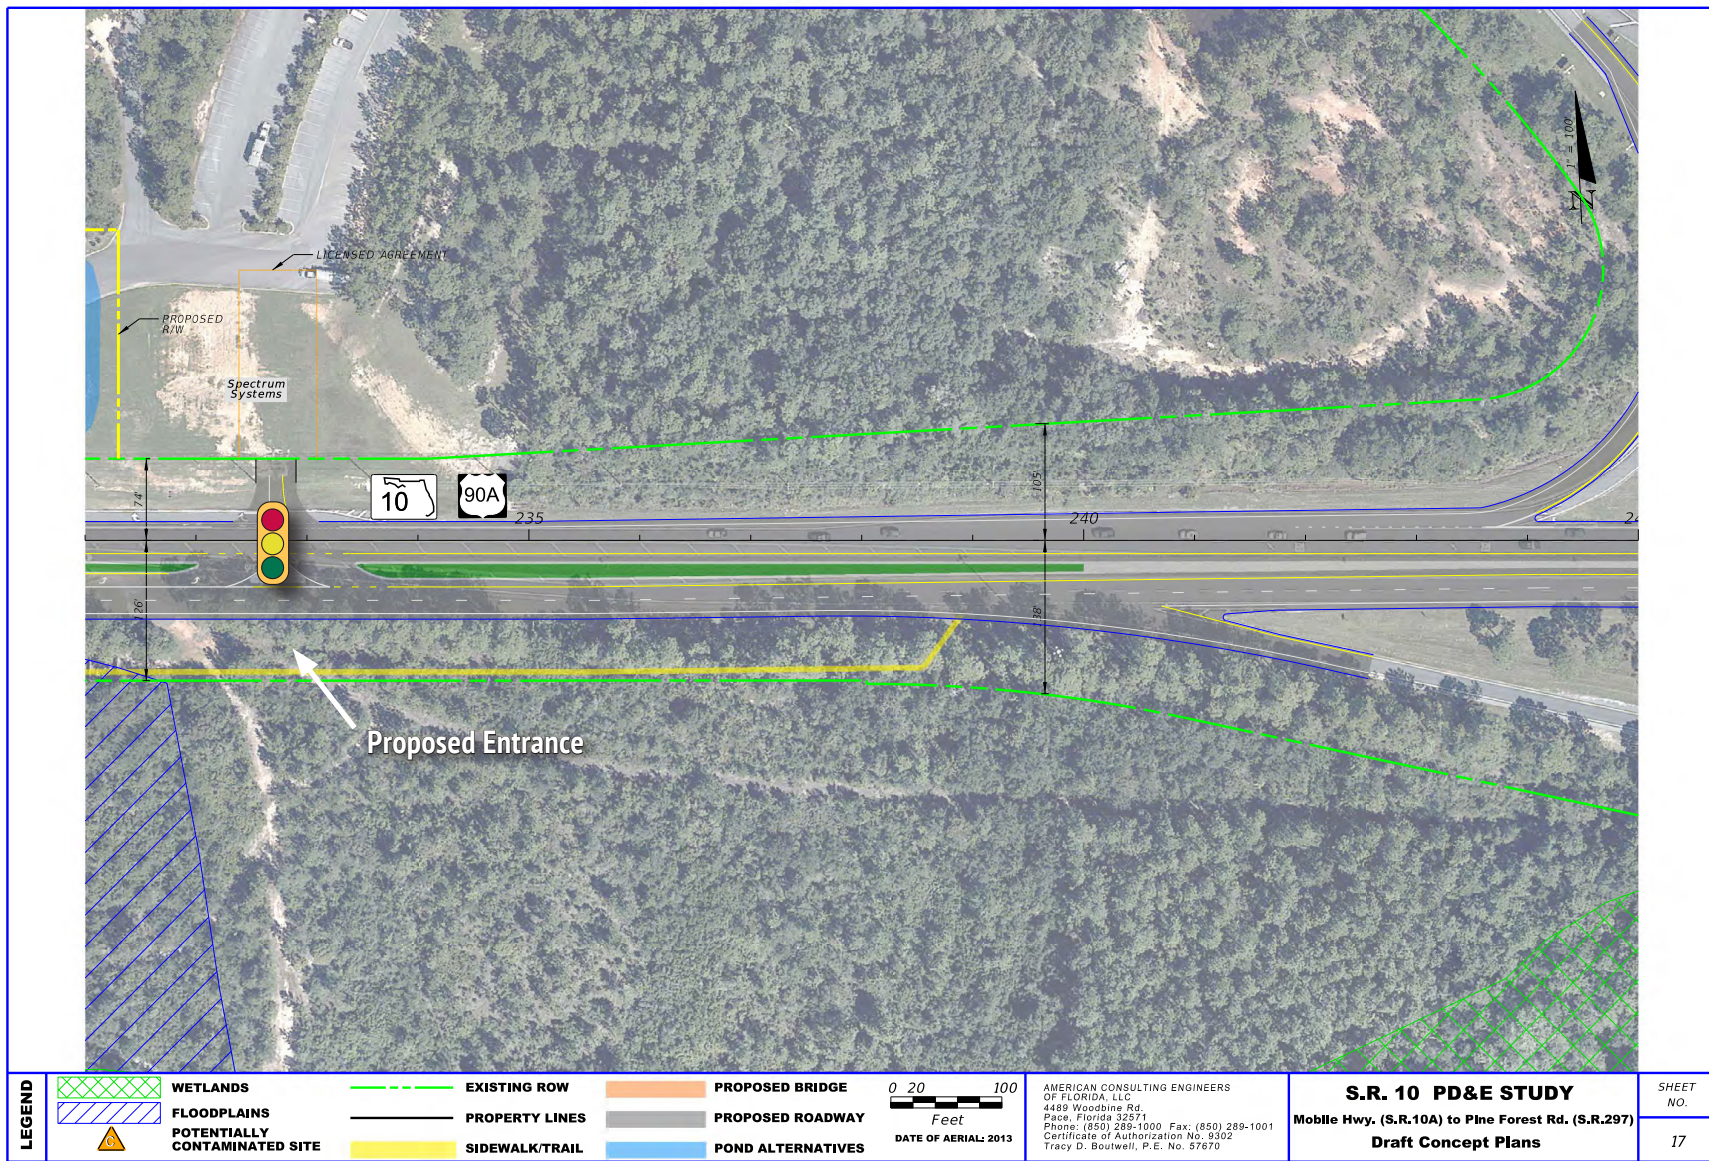

According to the Escambia County 2030 Comprehensive Plan, the property has a designated Future Land Use (FLU) Category of Mixed-Use Urban (MU-U). This is further described as being “intended for an intense mix of residential and non-residential uses while promoting compatible infill development and the separation of urban and suburban land uses within the category as a whole.”

Height Restrictions - There is a structure height restriction of 150'

Density – The density allowed under this zoning category is as follows:

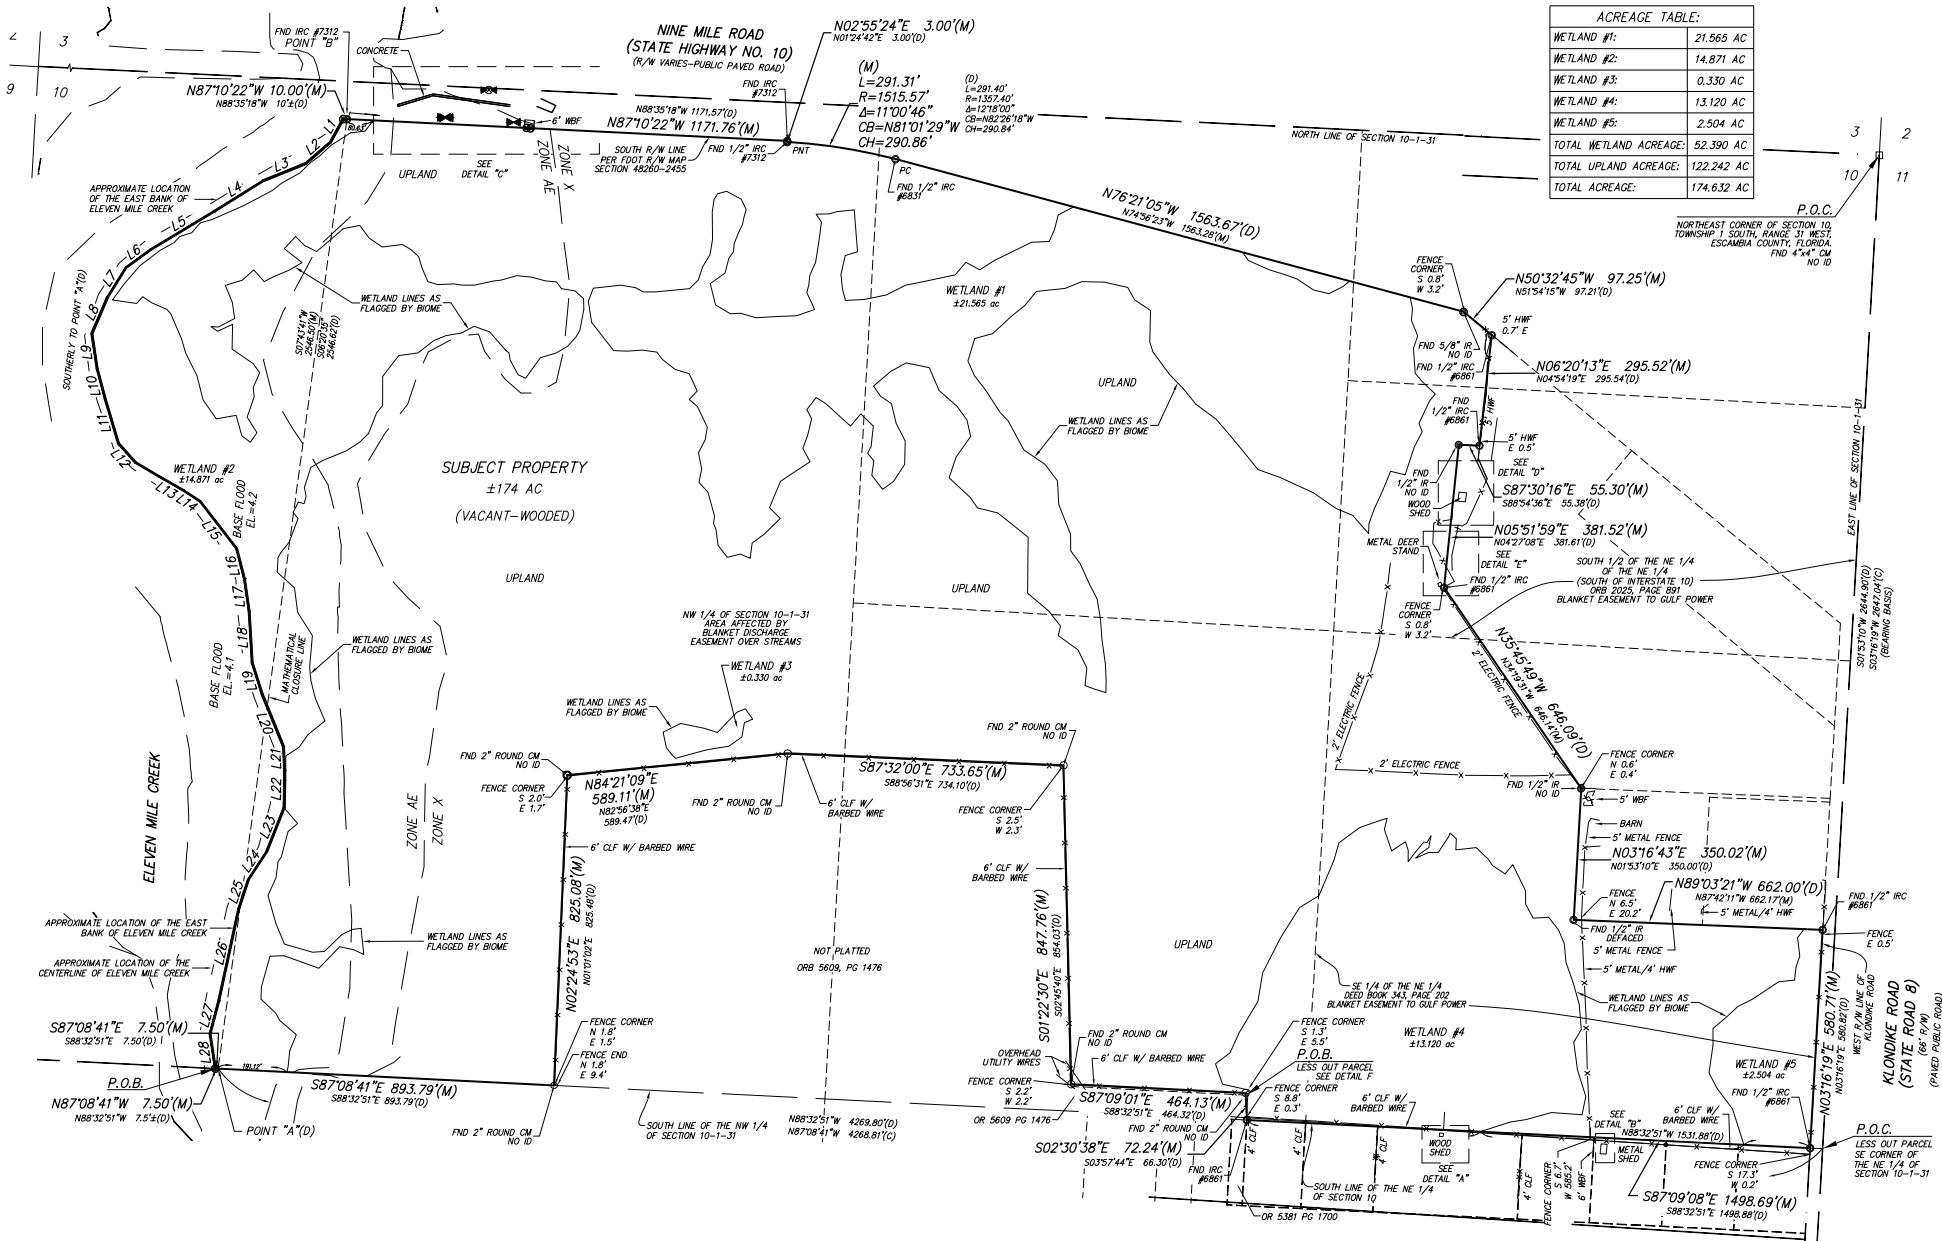

- Residential (Dwelling) – Minimum of 3.5 dwelling units / acre and Maximum of 25 dwelling units/acre.
- Residential (Lodging) – No limit by zoning.
- Commercial – Maximum floor area ratio (FAR) of 2.0.

Lot Coverage – Minimum pervious lot coverage of 15% (85% maximum impervious) for all uses. For non-residential uses, a maximum of 75% of the lot area may be occupied by principal and accessory buildings.

ACCESS/FDOT WIDENING

The site has more than 1,180 feet of frontage along Nine Mile Road (US 90), which will serve as the primary access point for East River Oaks. The State of Florida Department of Transportation is in the process of widening this Federal Highway from two lanes to four lanes. This project is expected to be complete by the end of 2019. The Seller has engaged VHB Engineers to perform a traffic analysis and coordinate the permitting for a traffic light with full median cut at our entrance. This process is ongoing, but preliminary reports have been very positive. The site also has access along Klondike Road although it is a much smaller more residentially oriented surface street than Nine Mile Road.
