

ONEPATH SYSTEMS

Low Voltage

Present by: Chad Merrill and Stewart Evans
July 22, 2016

What is Low Voltage?

- What makes a system “low voltage” vs. traditional electrical systems?
- Brief history and evolution of low voltage systems
- Why are these specialty systems broken out separately from traditional electrical systems?

Low Voltage Technology Solutions

From the structured cabling backbone that supports virtually all of the building automation systems to the user interface and related technology connecting the two, **Onepath** is ready to support your organization in its quest for technological excellence.

- Audio-Visual: The next generation of collaboration for your business
- Security & Access Control: Total security solutions for your workplace
- Fire & Life Safety: Protecting the people and property valuable to your business
- Structured Cabling: Your systems are only as good as their infrastructure
- Distributed Antenna Systems (DAS)

Types of Low Voltage Systems

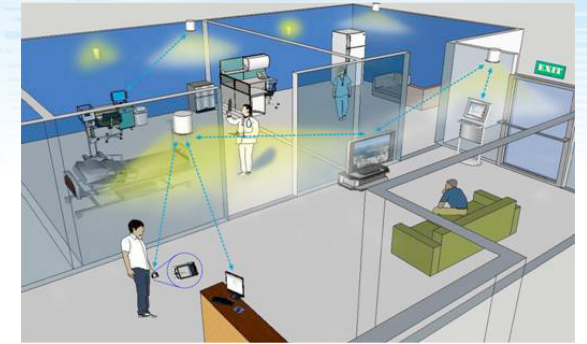

Fire Alarm Systems

Access Controls

CCTV & Security Systems

Wi-Fi Systems

DAS Systems

Audio / Video Systems

Structured Cabling / IT Systems

Challenges Between Low Voltage Integrators and General Contractors

- Simple communication of multi-systems complexity
- Lack of understanding between the GC & EC of the role and complexity of low voltage systems
- Role of the EC vs. Low Voltage Integrator
- Benefits of Low Voltage in the overall GC contract

Why is this Important to You and to Macallan?

- Technology integration is becoming a critical part of building delivery, the more we seek to understand, the more value we bring to our clients in delivery.
- We get asked to roll up LV scope on many projects as a “favor”
- It impacts Final Inspection / Occupancy in some cases
- Infrastructure coordination

The Onepath Philosophy

Our Philosophy

We work hard to be known as the integrator that fulfills our obligations **on time, within budget** and does so while **exceeding customer expectations**.

We promise to:

- Keep you informed throughout your project
- Provide on-going customer service
- Deliver options that are customized to your needs
- Use only the highest-quality products for your solutions
- Make it right with the Onepath Guarantee if you are not satisfied

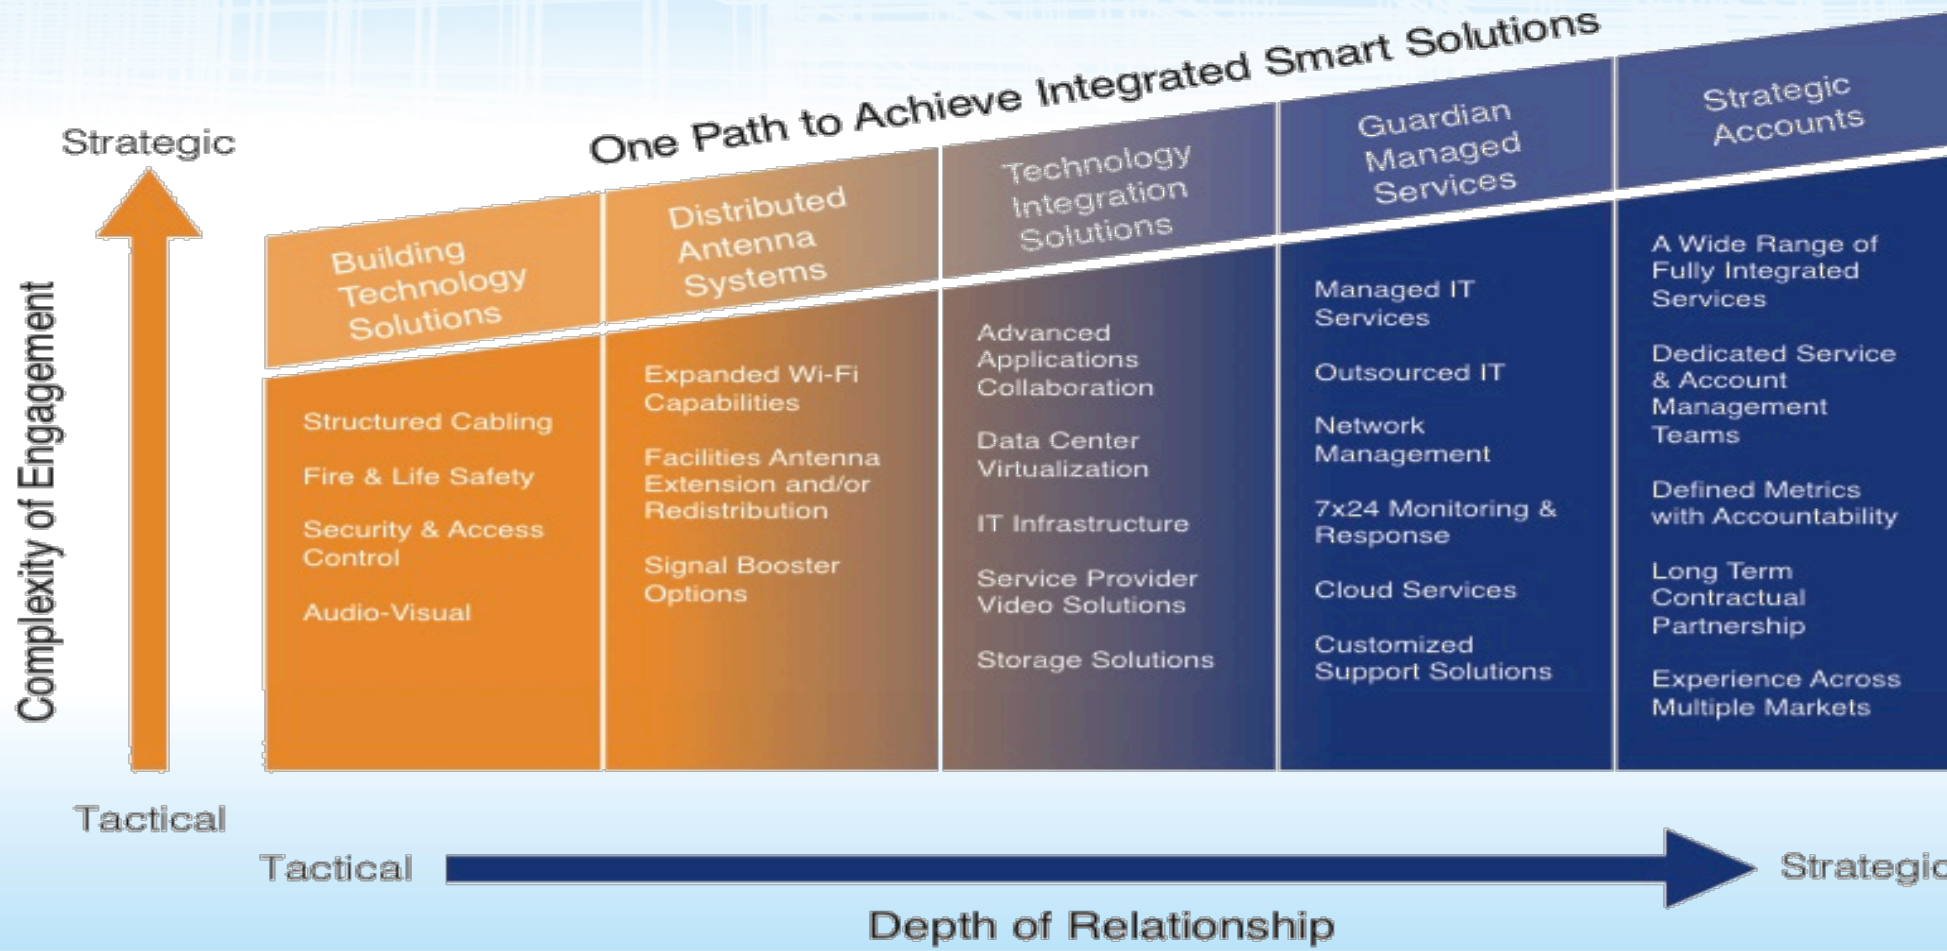

Onepath Clients

We work with industry leaders...

Onepath to Achieve Integrated Smart Solutions
